

## IRRIGATION OF GREEN AREAS: “PORTABLE SPRINKLER SYSTEM”

### Short description:

As the hotel grounds do not have many areas of lawn, the **Iberotel Lido** in South Sinai, Egypt, has made its irrigation sprinkler system portable. This means, that now the hotel only waters areas according to their needs, which depends on the degree of exposure and the weather. Instead of having all areas equipped with sprinklers, there is only one sprinkler system now, which can be moved around and used where necessary. Its coverage can be adjusted to be used in different areas.
